BASIC TO INTERMEDIATE APPLICATIONS IN POWERBI

COURSE INFORMATION

PowerBI is often referred to as the Ferrari of business intelligence and data visualisation applications – now is your chance to master the art of turning your data into an interactive dashboard! Businesses and individuals are overwhelmed by the sheer volume of data to make sense of on a daily basis, and the pressure from senior management is growing to present the data in a meaningful format. Interactive and visual reports need to be created, and PowerBI is the perfect tool for it! The purpose of this course is to enable the delegates to explore and use the basic to intermediate capabilities and applications in PowerBI, in order to leverage the power of interactive dashboards. This is likely to drive streamlined business intelligence and efficient decision making.
