ADVANCED DATA ANALYTICS AND MODELLING IN EXCEL

"The learning experience changed the way I view my job and helped me to think of a better way to improve things in my workplace"

COURSE INFORMATION

Building models in Excel plays a crucial role in the Finance Department, Procurement and various other departments of any business. It is therefore important that staff grasp the principles of modelling tools and techniques to improve productivity in their areas of expertise. The purpose of this practical and interactive course is to guide you through the Excel skills needed to perform your analytical function, as well as save you valuable time when building models in Excel. This has the potential to improve the overall value of your organisation and improve the productivity of individuals.

COURSE CONTENT

- Cleaning of data
- Solver and Goal Seek
- Scenario Planning
- Integrated Information functions and Text functions
- Financial functions (IPMT, PPMT, NPV, IRR XNPV, XIRR)
- Data validation and protection
